Regen Power/Curtin University participates in the Second Ajman International Environment Conference

Under the patronage of His Highness Sheikh Humaid bin Rashid Al Nuaimi, the Ajman 2nd International Environment Conference took place from 4-6 June 2012 at Sheikh Zayed Centre for Conferences and Exhibitions at the Ajman University of Science and Technology in the Emirate of Ajman, the United Arab Emirates.

The conference which had the theme, “An innovative approach to Sustainability”, brought together decision-makers, regulators, the private sector, professionals, youth and intellectuals to implement the most innovative and practical solutions for common challenges facing sustainable development. The conference also provided updates on the latest innovative technology that could be implemented to contribute to sustainable development.

Professor Chem Nayar, Regen Power CEO and Curtin University Emeritus Professor participated in the conference and gave an invited presentation on “Remote Microgrid” focusing on the application of Hybridgen- the variable speed diesel generator technology (patent pending) hybridising with solar photovoltaic and small scale wind generators.This paper will present case studies on previous hybrid power system projects and the limitations of the existing technology. Case studies on applications in remote mining, holiday resort and remote mobile telecom base stations were presented.
